January 2017

climate change is one of the greatest challenge that emissions of greenhouse gases continue to concern that all countries, particularly developing impacts of climate change and are almeand perior persistent drought and extreme weather events acidification, further threatening food security a sustainable development. Imist regard, they emprepresents an immediate and urgent global prior

Member States recognized that oceans, seas a component of the Earth's ecostym and are critic importance of the conservation and sustainable resources for sustainable development, including eradication, sustained economic growth, food states and the content of t

realizing their social, economic and environmental benefits, as well as facilitating technical collaboration and voluntary information and Paragraph 176]

Member States noted that sexel rise and other adverse impacts of climate change continue to pose a significant risk to small island developing States and their efforts to achieve sustainable development and, for many, represent the gravest of the text survival and viability, including for some through the loss of territor [7] a [agraph 178]

In "The 2030 Agenda for Sustainable Development" which was adopted in September 2015, Member States recognized that social and economic development depends on the sustainable management of our planet's natural resour the syexpressed determination to address decisively the threat posed by climate change and environmental degradation, and committed to take urgent action to combat climate change and its is passewell as to conserve and sustainably use the oceans and seeds marine resources for sustainable. These commitments are reflected in stainable evelopment Gal 13 and 14 and their associated targets including target 13.1 "Strengthening resilierated adaptive capacity to climated ated hazards and natural disasters in all countries", and target 14.3 "Minimize and address the impacts of ocean acidification, including through enhanced scientific cooperation at all levels".

The Paris Agreement has articulated the importance of ensuring the integrity of all ecosystems, including oceans and the protection of biodiversity

To support the implementation of stainable evelopment @al 14, the General Assembly adopted resolutions 70/226 and 70/303, in which Member States decided to convene the high level United Nations Conference to Support the Implementation of Sustainable Development Goal 14: Conserve and sustainably use the oceans, seas and marine resources in ble development at United Nans Headquarters in New York from 5 to 9 June 2017, coinciding with World Oceans DayThe Governments of Fiji and Sweden will loost the Onference. The overarching theme of the Conference will be "Our oceans, our future: partnering for the implementation of Sustainable Development Goal 14".

The Conference will be a great opportunity for Member States and all relevant stakeholders to identify ways and means to support the implementation of SDG 14, build on existing successful partnerships and stimulated variety and concrete new partnerships to advance the implementation of Goal 14, including those relating to address the challenges and effects of climate change on the oceans, and foster climate resilient sustainable development of oceans and seas.
