(Add your organization's concise, concrete, and action-oriented recommendations for Chapter 3)

Chapter IV. Youth and future generations

(Add your organization's concise, concrete, and action-oriented recommendations for Chapter 4)

To achieve agenda 2030, youth engagement in climate change is very important. Science and innovation technologies need assessments. Youth are high value potential to identify technological gaps and set priority needs to achieve NDCs. Youth actions should focus on to strengthen policies and measures aimed at improving national and regional technological capabilities and encourage innovation. Economy should redesign. We should consider human as central value other than power and money game then treat nature with same value as we do for us. We should invest in youth focus inter generational projects. It's important to engage young professionals in capacity building and policy negotiation table. Youth has power and economical dynamism.

Chapter V. Transforming global governance

(Add your organization's concise, concrete, and action-oriented recommendations for Chapter 5)
