Chapeau

(Add your concise, concrete, and action-oriented language for the Chapeau)

Chapter I. Sustainable development and financing for development

(Add your organization's concise, concrete, and action-oriented recommendations for Chapter 1)

Chapter II. International peace and security

(Add your organization's concise, concrete, and action-oriented recommendations for Chapter 2)

Chapter III. Science, technology and innovation and digital cooperation

Proposal:

To recognize the current and future role of national and subnational scientific expert panels and sustainable development advisory councils in the transition towards a sustainable future, due to their SciencePolicySociety interface position.

Justification:

Due to their nature, composition and mandates, these bodies are able to organize broad stakeholder inclusion, enhancing better connections between society, science and policymakers.

As stated in the Global Sustainable Development Report 2019 "The Future is Now: Science for Achieving Sustainable Development", prepared by Independent Group of Scientists appointed by the Secretary General, "Science can support and be guided by the 2030 Agenda, with its 17 Goals and inherent trade offs and co-benefits. Engagement on behalf of the Goals can be facilitated by, among others, permanent national and international scientific expert panels and advisory councils for sustainable development" (https://sustainabledevelopment.un.org/content/documents/24797GSDR_report_2019.pdf page 151).
